

# Case Study

## Consolidation of Data and Implementation of Enterprise Performance Management

### Functional Context & Requirement

- One of the largest privately owned agribusinesses servicing livestock and aqua industries, employing 2,400 across 22 production facilities in 10 countries.
- Multiple locations running multiple system – challenged to do budgeting forecasting etc. without unified system – chose Infor EPM to solve

### Our Solution & Approach

- Fortude owned the project to data extraction
- Developed bespoke data extractors working using MS SQL, Dbase FoxPro and Oracle
- Project managed implementation of EPM

### Impact

- Enabled capture of data from 38 locations globally
- Allowed maximization EPM tool capabilities through the consolidated data: Enabling financial consolidation, budgeting, BI reporting
