

PLATFORM TECHNOLOGY

Infor Testing as a Service (TaaS)

An intuitive software testing platform designed for business users

Most organizations are made up of business users who are experts at running their companies, not experts at software testing automation. The Testing as a Service (TaaS) platform delivers powerful software that features an intuitive graphical interface and smart technologies, like artificial intelligence and machine learning, to make software test automation simple and easy.

Key features

- "No coding required" graphical workflow automation
- Recording and playback of user interactions
- Designed for the ERP user and the way they think
- "Near zero" learning curve
- Support for complete web-based suite-level testing
- Ability to create scripts even when the system being tested is unavailable.
- Browser-based; nothing to install
- Cloud architecture, SaaS operation

Full testing cycle

- Test case management
- Test workflow automation
- Manual testing
- Automated testing
- Advanced scheduling of executions to fit your plan
- Reporting and analytics
- Quick view dashboards and navigation (coming soon)

Testing paradigms

- Web-based testing
- API testing
- Web services testing

Types of testing supported

- Infor, third-party, and custom applications (applications that follow good testability standards)
- Cloud and on-premises applications
- Functional testing: User interface layer, services layer
- Non-functional testing: Cross-browser testing, compatibility testing
- Customer-developed UI extensions

Subscription includes

- Cloud-based testing platform
- Access to Infor's library of pre-built test cases
- Test Case Management, workflow automation, execution planning, and results analysis
- Browser-based, nothing to install
- Browser-based tools that provide one stop for all workflow automation and execution
- Crowd-sourced community of scripts
- Unlimited seats
- Unlimited test execution
- Unlimited support

Platform components

- Test case designer
- Test case documentation and management tools
- Visual workflow designer requiring near zero learning curve for business users with no coding experience
- Browser-based interface with nothing to install
- Record and playback of user interactions right from your browser
- Online test case library with access to thousands of test cases from Infor and user community
- Test execution manager for automated scheduled and manual on-demand execution
- Cloud based regional execution agent farms which can be supplemented via Bring Your Own Agents (BYOA) within your own network (coming soon)
- Visual results reporting with API based integrations to Birst or other 3rd party analytics engines (coming soon)

A powerful platform for the business user

- Infor TaaS combines both platform and content; customers can use pre-built tests against Infor products or develop custom tests quickly and easily.
- Support the following testing paradigms: web-based testing, API testing, web services testing.
- Graphical interface for test case documentation, workflow creation, execution planning and results analysis.
- Simple and easy testing of REST API Automation.

Available test libraries for Infor products

- CloudSuite™ Automotive
- CloudSuite Aerospace & Defense
- CloudSuite Corporate
- CloudSuite Distribution
- CloudSuite Distribution Enterprise
- CloudSuite Equipment
- CloudSuite Fashion
- CloudSuite Financials & Supply Management
- CloudSuite Food & Beverage
- CloudSuite Healthcare
- CloudSuite Human Capital Management (HCM)
- CloudSuite Industrial
- CloudSuite Industrial Machinery
- CloudSuite Public Sector
- Enterprise Asset Management (EAM)
- Global Human Resources (GHR)
- Hospitality Management Solution (HMS)
- LN
- M3
- Syteline
- Talent Management
